Dtachable Vehicle**

**Gate 60 - Scientific
Calculator**

Redeemer Plus

e

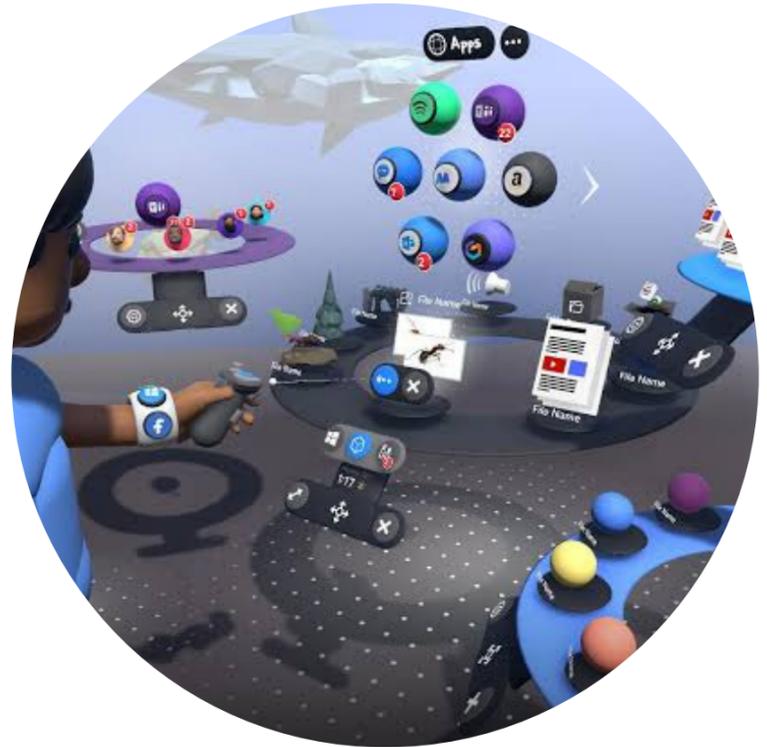

Bangaru Sambadhalu

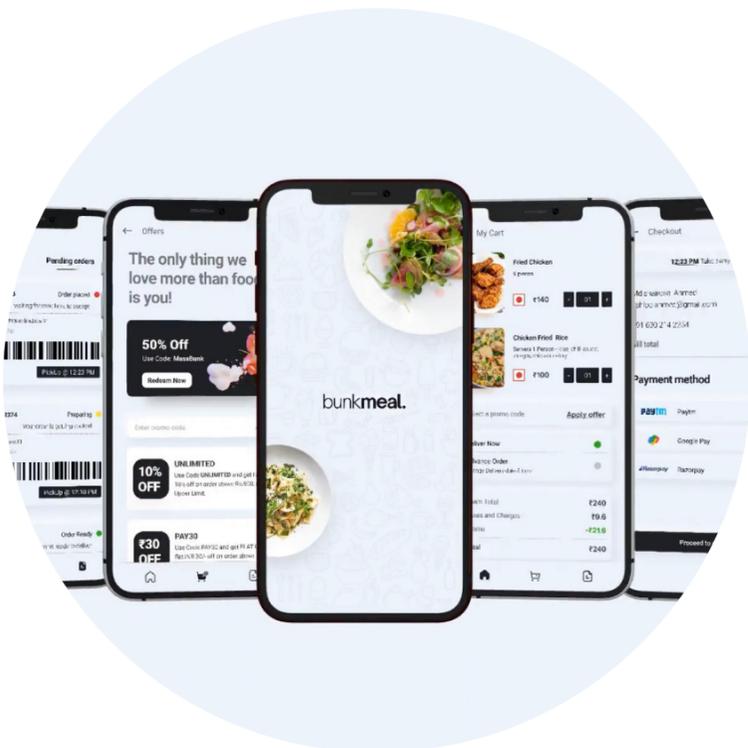

Products Developed

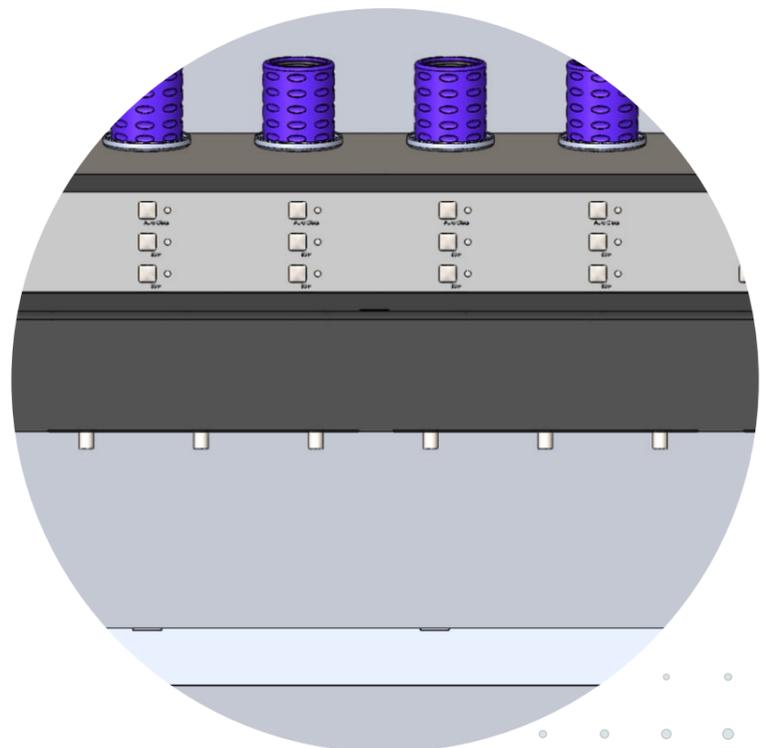

Aqua Skimmer

Mequette XR

Bunk Meal

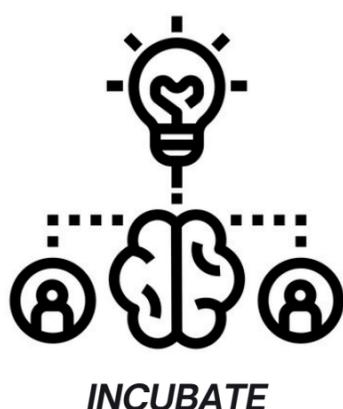

**Alcohol Dispensing
Machine**

Flagship Programs

Ignite is a certified design thinking program to promote innovation and entrepreneurship among graduates and youth. The course is specifically designed to orient the graduates on the concepts of design thinking, facilitate interaction with young start-up founders and give the graduates exposure to the nuances of the entrepreneurial journey.

Spark is an Ideation Program designed to help idea stage innovators to develop a solid foundation for their businesses and prepare for a full-fledged incubation program.

JTBI offers customised incubation support and services for early-stage startups led by startup founders and student innovators through mentoring, and handholding the ventures on the aspects of technology, business, go-to-market, compliance and funding, leading to enterprise growth and development at early stages.

The objectives of the program will be mutually laid down by JTBI and the supporting partners for the program. Overarching objectives of all JTBI Accelerator programs are to identify high-potential ventures at the growth stage and provide them the platform and support required to speed up market traction.
